

Cliff Cezar

Quiapo, Manila, Philippines | (+63) 970 839 8415 | clffczr@gmail.com
github.com/cgcezar | linkedin.com/in/cliff-cezar

Summary

BS Computer Science graduate from the University of the Philippines Baguio with full-stack web development experience and a background in agent-based modeling and data analysis. Built and shipped a web platform for SILBI, handling backend automation and collaborating with designers on interface refinement. Experienced with Python, PHP, JavaScript, and C/C++, with practical use of Git and AWS. Also served as club treasurer for two years, developing skills in budgeting, financial reporting, and cross-team coordination.

Education

Bachelor of Science in Computer Science — University of the Philippines Baguio
Department of Mathematics and Computer Science, Baguio City, Benguet | 2020 – 2026

Experience

Researcher — UP Baguio Department of Mathematics and Computer Science
Baguio City, Benguet | Sep 2025 – May 2026

- Built an agent-based simulation model in NetLogo to study how COVID-19 spreads in dense urban communities.
- Modeled resident behavior and movement across two barangays in Quiapo, Manila, comparing three food relief strategies through 100 simulation runs per scenario.
- Analyzed simulation results using statistical tests in R to identify which relief strategy most reduced disease spread.

Software Developer — SILBI Web App Project
Baguio City, Benguet | Feb 2025 – May 2025

- Developed a centralized web platform giving business incubatees access to learning resources, announcements, and communication tools, covering the full development lifecycle from requirements gathering to deployment.
- Implemented backend logic to automate roadmap tracking, meeting scheduling, and legal document generation, cutting manual admin work.
- Collaborated with designers and stakeholders on UI/UX, refining the interface based on real user feedback.
- Built scalable, maintainable features on a Linux-based environment to support the platform's growth.

Treasurer & Finance Service Director — Rotaract Club of UP Baguio
Baguio City, Benguet | Jul 2023 – Jun 2025

- Managed collection and documentation of RI Dues and membership fees, ensuring timely remittance and accurate records.
- Oversaw budgeting and financial tracking for income-generating projects, contributing to the club's sustainability and outreach.
- Conducted canvassing and price comparison for materials used in fundraising activities and events.

- Prepared financial reports and expense breakdowns presented at general assemblies and officer meetings.

Projects

Job-Tag: Job Application Tracker — Developer

Personal Project | 2026

- Built and deployed a full-stack web app for tracking job applications, including a calendar for interview and deadline schedules and file upload and download for resumes, CVs, and other application documents.
- Implemented automated data entry that reads a pasted job posting link and fills in job title, company, work setup, and employment type, removing most of the manual encoding per application.
- Published as an open-source repository with documentation and license, deployed on Vercel.
- Live site: job-tag.vercel.app | Source: github.com/cgcezar/job-tag

Byte: A Coding Pet — Developer

Personal Project | 2026

- Built a browser-based virtual pet game in React and Vite where every interaction is earned by solving a JavaScript coding challenge instead of clicking a button.
- Implemented a test runner that executes user-submitted functions against test cases in a contained scope, reporting per-test results and handling syntax and runtime errors without breaking the app.
- Designed an XP and evolution system with three difficulty tiers and decaying pet stats, keeping game logic as plain framework-independent JavaScript separate from React state and UI components.
- Source: github.com/cgcezar/byte-coding-pet

Open Climb 2026 Website — Developer

UP Baguio Mountaineers | March 2026

- Built and launched the official event website for Open Climb 2026.
- Handled event information, registration, and promotion in a single public-facing site.

Skills

Programming: Python, PHP, JavaScript, SQL, Matlab, R, C/C++, Java

Web & Tools: Figma, React, Vite, Node.js, LaTeX, Git/GitHub, AWS, Vercel, Linux, UNIX, Windows, AI & Automation

Design & GIS: Canva, QGIS, ArcGIS

Languages

Onhan (Native), Filipino (Fluent), English (Fluent), Japanese (Basic)

Interests

Mountaineering, Cartography, Cooking, Photography, Ultimate Frisbee
